HGNC Name: C3

UniProt: P01024

RRID: AB_2572258

Immunogen: Recombinant netrin domain of human C3

Format: Purified antibody at 1mg/mL in 50% PBS, 50% glycerol plus 5mM NaN₃

Storage: Store at 4°C for short term, for longer term at -20°C

Recommended dilutions:

WB 1:1,000-1:5,000

Applications	Host	Isotype	Molecular Wt.	Species Cross-Reactivity
WB, ELISA	Mouse	IgG1	185kDa	Hu

Western blot analysis of MCA-6E8 on human serum samples. 0.1 μg purified human C3 protein (lane 1) and 10 μg normal human serum protein (lane 2) were blotted with MCA-6E8 at a concentration 1:3,000. The MCA-6E8 monoclonal binds strongly and cleanly to a band at about 115kDa which represents the intact α subunit of C3 and a weaker proteolytic band at approximately 40kDa. Bands at 190kDa and above are likely the pro-C3 and its glycosylated form.

Background Complement component 3, often simply called C3, is the third protein in the complement system. The complement system "complements" the ability of antibodies and phagocytic cells to clear pathogens such as bacteria and viruses from the organism and can trigger inflammation and remove debris from cells and tissues. C3 is involved in both the classical and alternative pathway. The MCA-6E8 antibody binds to the netrin-like domain in the α subunit of human C3.

FOR RESEARCH USE ONLY. NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE.
